

## **ABSTRACT AMENDMENTS**

### **Abstract of the Disclosure**

A ~~lock~~ lock clamp apparatus is a kind of clamp. It includes a first clip, a second clip and a space between the first, second clips, and ~~the a~~ a stander ~~by the wall to hold it staidly in the air~~ to hold objects. When the two clips join together, the stander will automatic close-up and the things you hang on the clamp apparatus will not ~~full~~ fall off. It just needs one ~~handle~~ hand to control all the steps to clip things to it.
